Vancouver, BC V5Z 4C2

Dear Sirs:

I am writing in support of the proposed Chronic Addiction Substitution Treatment (CAST) research trials.

We believe that scientifically controlled studies aimed at finding solutions to the health and social issues associated with chronic addiction are essential, and we wholeheartedly support your efforts.

Chronic addiction has become one of the greatest issues in Canadian health, and its prevention and treatment, including the management of related medical complications, deserve urgent attention.

We hope your efforts will result in advances in management that will benefit all.

Sincerely,

Brian Day, MD  
President
